

StashAway™ Seatback Trash Station Installation Instructions

Start by installing the plastic brace (included):

- Locate webbing handles on the left and right sides of the *StashAway Floor Trash Bin*

- Insert a plastic brace end into one of the slots located under the handle ends.
- Slightly bend the brace and slide the other end into the opposite slot to secure.
(do not bend the brace too far as it may break)
- Repeat for the other side.

Installing/Replacing Tissue Box

- Place tissue box at the back of the *StashAway Seatback Trash Station* with the tissue dispensing opening facing the plastic tissue gasket on the front.
- Locate elastic strap at the back.
- Lift the elastic strap, attaching the hook and loop together to secure the tissue box.

To position on the seat back:

- Buckle the strap around the headrest posts and adjust to fit.

We recommend using the *StashAway Seatback Trash Station* on the back of the passenger seat for driver access.
