

TrimTrash™ Hanging Trash Bag

Installation:

There are 3 ways to install this bag

1. **Hook and Loop Strap** - Wrap strap around any hook or metal headrest post and secure the hook and loop fasteners.

NOTE - Do not attach to any shift, brake, steering or operational parts.

2. **Foam Glove Box Disc** - Place strap through one slot on the foam disc then back through the 2nd slot. Secure the hook and loop fasteners together. Place the foam disc inside your glove box and close the door. Adjust strap length as needed.

NOTE - The bag is only secure while the glove box is closed. Please hold onto the bag before opening glove box.

3. **Suction cup** - First clean the area of the window or dash where you wish to place the suction cup. Once in position, pull the hook down to create an extra strong suction. Hang the bag on the hook through the grommet in the bags strap.

NOTE - Do not place where vision can be obstructed

Components:

A) TrimTrash with hook and loop strap

B) Foam glove box disc

C) Suction cup hook
