## Battery - Motion Activated Night Light

### Battery installation:

With back of light facing with thumb grips ≡ at the bottom, slide the back panel down to remove the back cover

Place 3 AAA Batteries inside as shown

Replace cover by inserting the 4 tabs on cover into slots on back of light and slide up

### Using adhesive tape:

Once desired location is found, wash area thoroughly with soap and water and dry completely

Remove protective covering from one side of the double sided adhesive tape and place sticky tape on back of cover

Remove second protective covering from other side of tape, and while making sure thumb grips ≡ are located at the bottom, press night light to desired area
